

<u>English</u> Write an action scene from any favourite film or create your own! Try to use some action and descriptive words. 	<u>Maths</u> Write instructions for how to convert between fractions and decimals and/or fractions and percentages. Make sure you include both the instructions AND some examples.	<u>Computing</u> Have a go at using Microsoft Word to present a piece of work of your own choice. Try out all of the different skills we have practised in class including inserting pictures and changing font/type and size Think about spelling and punctuation!
<u>French</u> Draw different items that you use in school and label them in French. 	<u>Science</u> Draw a picture of the solar system with all of the planets in order.  Make sure you name them, spelling their names correctly.	<u>Maths</u> Make a game of snap with equivalent fractions. (You could challenge yourself further to include equivalent decimals and percentages.) Eg.  and  SNAP!!
<u>History</u> We will be learning about the Mayan civilisation this term. Design a fact page about anything you find out to share with the class. 	<u>Art</u> Create a model of the solar system! Be as creative as you like! If you create a form of model, please either take a photo or bring it into the class where I can show them off.	<u>Music/ French</u> Our focus this term is singing games. Learn a song in French. This could be one you have heard before or a completely new one. Try practising it at home so you can share it with the class. 

Class 5SA Spring 1 Homework Sheet When a piece is completed, please bring it into school. I would love to put some up within the classroom
