

Year 5 Summer 2 Homework Sheet When a piece is completed, please bring into school! I would love to put some up within the classroom!

<u>Science</u> Explain the lifecycle of any animal of your choosing and label each stage and explain what happens between them.	<u>Art/Science</u> Draw and label the key parts of a plant and label what each part does and how it can help the plant grow.	<u>English</u> Create your own adventure story! This can be on any topic. Make sure to include lots of detail of your adventure so I can see where you go!
<u>Math</u> Using squared paper (can be provided if needed) create your own translation or reflection question for a family member and have them complete it! Make sure to check their answers.	<u>French</u> Create a poster about all of the seasons in French, create some pictures and use bright colours to make your seasons pop!	<u>Math</u> Following our next unit in math: Accurately measure items within your house (use pictures as evidence). Try to get the most accurate measurement possible.
<u>Computing</u> How can databases be useful? What jobs will use them more commonly? Write down reasons as to why they can be helpful and why they are not helpful.	<u>Science/English</u> Write a diary of a young child growing up about what they are looking forward to being able to do when they grow up. E.g driving, ging on holidays with friends and no adults! What fun changes are going to happen as you grow up?	<u>Geography</u> Create a fact file about each of the 5 major oceans. Include water depth, sea life, what countries are around the ocean! Be sure to add in some fun facts.
